Summary

Senior Quality Assurance & Test Engineering Professional with over 20 years of experience in software testing, quality strategy, and systems validation across diverse industries. Adept at QA process improvement, test planning, and stakeholder engagement in cloud-based and on-premise environments. Strong background in leading manual and automated testing initiatives, mentoring teams, and refining QA methodologies to ensure software meets and exceeds business and functional requirements. Adept in both leadership and individual contribution to and for all software quality management, systems administration and IT projects. Computing technologies professional experienced in a broad range of technological areas across platforms inclusive of UNIX, Linux, OS X, Windows, iOS, Android and Cloud.

Experience

Ad Hoc LLC, Senior QA Engineer June 2023 - Present

- Drives quality assurance strategy for the Office of Head Start TTA Hub, ensuring software reliability and usability for critical government services.
- Develops and refines testing methodologies, including test automation with JavaScript and Playwright, to improve efficiency and test coverage.
- Leads small-scale QA initiatives and process improvements, reducing inefficiencies and enhancing QA workflows.
- Works closely with stakeholders and cross-functional teams to ensure alignment with project goals, presenting comprehensive testing strategies.
- Previously enhanced testing frameworks for the Veterans Administration Health Enrollment project.

RedLine Performance Solutions, Application Analyst February 2023 - June 2023

- Validated software functionality and reliability for NOAA's mission-critical Weather Service Alerts system.
- Conducted performance and vulnerability testing using JavaScript and K6.io to identify and mitigate security risks.
- Designed and executed detailed test plans and test cases, collaborating with developers to track and resolve issues in Jira.
- Created comprehensive documentation and test reports, improving process transparency and traceability.

F5 Networks, QA Engineer III / Site Reliability Engineer July 2014 - October 2022

- Led manual and exploratory testing for the iHealth product across Windows, macOS, Linux, VMware, AWS, and Azure environments.
- Developed and maintained automated UI tests for a LAMP stack application using Python and Selenium, optimizing testing efficiency.
- As team SRE, managed system monitoring and incident escalation, ensuring 99.9% uptime of critical services.
- Recruited, trained, and mentored offshore QA personnel, fostering a collaborative and skilled global team.
- Authored extensive technical documentation in Confluence, streamlining knowledge sharing across teams.
- Participated in node.js test automation using Cypress and Mocha as well as REST API test automation utilizing Ruby & Selenium.
- Responsible for test suite development, testing, and other test-related activities for a Java-based/LAMP stack web application (ihealth.f5.com).
- Provided internal consulting support for applications to other F5 teams.
- Direct experience in Windows, macOS, Linux, VMware, AWS & Azure, and F5 hardware/software systems (BigIP/TMOS) configuration and testing.

Topia Technology, QA Lead July 2013 - June 2014

- Owned the end-to-end testing process for desktop, mobile (iOS), and server platforms.
- Developed and maintained an automation framework using Python and Selenium, which was integrated with Testlink.
- Managed Mantis and Redmine bug-tracking databases and documented all test procedures on the Jira Wiki.
- Mentored QA staff on testing best practices and skill development.
- Reviewed feature specifications.
- Defined test methodology and tools.
- Performed REST API testing with Python.
- Performed WEB UI testing with Python & Selenium.
- Performed iOS testing with Xcode Instruments & Javascript.

CHI-LLC, QA Lead August 2012 - July 2013

- Led a team of four QA engineers, enhancing project efficiency by

implementing standardized QA methodologies.

- • Implemented the TestComplete automation framework to streamline testing processes and improve output quality.
- • Integrated QA metrics into project management schedules to track progress and report on quality.
- • Defined roles and responsibilities of QA Engineers.
- • Recruited, Mentored and Trained QA Engineers.
- • Monitored and Managed bug database.
- • Worked with Dev/Project Management to maximize effectiveness.
- • Created and executed automated test cases.
- • Maintained test tools/systems.
- • Implemented automatic build-triggered automated smoke tests.
- • Continuously self-trained in related/supporting technologies.
- • Reviewed feature specifications.
- • Interviewed developers responsible for feature creation in absence of specifications.
- • Created & maintained per feature test plans.
- • Owned all Functional/Features Testing.
- • Provided as-needed backup to technical phone support team for breaks, absence and vacations.

Experis Technology Group, Software Test Engineer April 2012 - August 2012

- • Manual and Automated testing of Amazon Kindle application on Android phones and tablets.
- • Administration and troubleshooting of Windows and Ubuntu Linux Systems.
- • Worked with Android SDK to install and debug custom applications on all versions of Android OS.

FBI NGI Project (Safran), Test Engineer II September 2011 - April 2012

- • Software Testing of Red Hat Enterprise Linux based product (LBI clearance held), including test authoring, test execution and live product tests with customer present.

Ensynch (at Intel in DuPont, WA), Lab Systems Administrator January 2011 - October 2011

- • Computer Lab management and systems administration.

- • Setting up server/network environments as required for multiple groups.
- • Deploying and Administering Windows and Debian Linux guest operating systems on VMWare VSphere.

NAMI Sonoma County, Volunteer IT Tech July 2010 - December 2010

- • Performed IT services on a volunteer basis including configuring printers and desktops, domain administration and general technical support.

Netpulse, QA Engineer September 2009 - September 2010

- • Senior member of QA dept at entertainment industry startup.
- • Embedded Linux hardware/software implementation with support client/server environment.
- • Test equipment ordering and installation.
- • Test bench / lab administration.
- • QA Wiki design, Test Plan authoring, Bug tracking, Specification review.
- • Backup to IT/Support department.

Standard Computing, Owner September 2008 - September 2009

- • PC & Mac Computer Consulting specializing in Builds, Installs, Upgrades, Repairs, Networking, Tutoring and Consulting.

Hewlett Packard Enterprise, Software Engineer II April 2007 - October 2008

- • Software Testing position with the Storage Automation team testing SAN/NAS monitoring, configuration and deployment tools.

Marchex, Software Test Engineer/Systems Administrator March 2005 - February 2007

- • Software testing of SEO and Feed Aggregation products.
- • Test responsibilities included: Authoring & executing test plans.
- • Member of Performance Test Team primarily responsible for backend systems testing of Linux-based Java and Oracle system components.
- • Systems: Debian Linux & Microsoft Windows XP.

Cisco (Contract with Pure Networks), Software Test Engineer August 2004 - March 2005

- • Contract position testing home networking software and services.
- • Test responsibilities include: Authoring & executing test plans/cases for Accessibility testing of client application & Datacenter testing of server application provisioning & logging.

- Built out of PCs for lab setup / install, image creation and lab support.
- Systems: Microsoft Windows XP, Red Hat Enterprise Linux AS, FreeBSD.

TeleCommunications Systems Inc, Operations Test Engineer March 2004 - July 2004

- Customer-facing Test engineering project within the operations organization at TCS testing First Office Application rollouts to production network with customers and partners.
- Testing responsibilities include: Driving multi-vendor testing via teleconference, Authoring Test Plans and Systems Administration of test lab.
- Systems: Microsoft Windows XP, SUN Solaris 8, Red Hat Enterprise Linux ES 2.1.

Excell Data Corp @ Microsoft, Software Test Engineer December 2003 - March 2004

- Contract position with Microsoft Reliability Analysis System team testing Microsoft hosted .NET web service providing collection, analysis and reporting of Windows Server & Service components.
- Testing responsibilities include Client, Server and DB testing, test plan & case authoring, build propagation and test lab management.
- Systems: Microsoft Windows XP, Microsoft Windows 2000, Microsoft Windows 2003.

Excell Data Corp @ Microsoft, Software Test Lead Engineer July 2003 - September 2003

- Contract position with Microsoft Solution Accelerator for UNIX Migration team leading test effort in the creation of database migration guidance.
- Specific project encompassed Solaris-based Sybase ASE migration to Windows 2003-based MS SQL 2000 platform.

Yoh, A Day & Zimmermann Company, Software Test Engineer January 2003 - July 2003

- Contract position with Operations Systems Support team testing NMS & SNMP software on Solaris 2.6 & 8.
- Lab design & management for three computer labs inclusive of network setup, system purchase/installation and software installation/configuration.
- Solaris systems administration & support for Test server resources.
- PERL & Bash shell script authoring.
- Products used & tested: Mercury Interactive Test Director, Solstice

Enterprise Manager and BMC Patrol & Performance suite.

- • Systems: Microsoft Windows 2000, SUN Solaris 2.6.

ViAir, Software Test Engineer September 2000 - October 2002

- • Wireless Web application testing inclusive of WML, HDML, JSP & Java based products and services for PCs, RIM Blackberries and WAP-enabled cellular phones.
- • Tester for Wireless Inbox product coordinating and managing major component test coverage.
- • Test plan authoring.
- • Solaris System Administrator managing six SUN servers.
- • Test lab management responsible for setup, maintenance and staffing of test bed staging and automation servers inclusive of IIS5, Oracle, MS SQL Server & Servletexec JSP server.
- • Systems: Microsoft Windows XP, Microsoft Windows 2000, SUN Solaris 8.

(Unnamed Company), Test Engineer April 1999 - September 2000

- • Authored, Maintained & Executed Web-to-Host test plan areas: Unix Setup, Security and Java/WebObjects SDK.
- • Entered, tracked & evangelized software bugs & documentation errors.
- • Maintained and Administered test systems including: Microsoft Windows NT4, Microsoft Windows 2000, SUN Solaris 2.6, SUN Solaris 2.7, HP-UX 11.x and Red Hat Linux 6.0.

Volt, Software Test Engineer March 1998 - April 1999

- • Participated in ZAW/TCO initiatives as part of the Internet Explorer Administrators Kit test team.
- • Authored Maintained & Executed TCO test plan areas: BVT, Stress and Y2K.
- • Test OS/platforms managed: Microsoft NT 4, Microsoft Windows 2000 Alpha, Microsoft Windows 95 (Gold, OSR 2.x) & 98.
- • Server platforms included both Intel & Alpha based systems.

Volt, Software Test Engineer June 1997 - March 1998

- • Participated in 3rd Party Network testing as part of the Windows 98 test team.
- • Tested Terminal Emulation products over Windows 98 networking

protocols ensuring continued interoperability with feature changes therein.

- • Authored, Maintained & Executed terminal emulation test plans for products: IBM Personal Communications Gateway, Attachmate Extra product line, Wall Data Rumba product line, WRQ Reflection product line.
- • Administered lab test systems: Microsoft SNA Server, Novell Netware for SAA Gateway, IBM 3174 Cluster Controller.
- • Credited contributor to Windows 98 Resource Kit.

Wall Data, Senior Technical Support Engineer November 1995 - June 1997

- • Escalations support point for corporate IS/IT managers using Rumba products.
- • Team resource and technical mentor.
- • Winner 1997 VP's Customer Satisfaction Award for Outstanding Technical Support.

Attachmate, Support Specialist II March 1993 - November 1995

- • Senior technical analyst position supporting IT/IS managers and professionals using Extra products.
- • CompuServe Forum sysop.
- • Authored technical articles on Extra products.
- • Corporate beta tester for Windows 95.

Genelex, Network Administrator February 1991 - March 1993

- • Administered Novell Netware network.
- • Provided PC Help desk services & support.
- • Performed office management and bookkeeping functions.

Education & Professional Certifications

University of Washington (2000-2023)

- • 2000-2001: Object-Oriented Programming theory with UML.
- • 2003-2004: UNIX/Linux Systems Administration (certification program).
- • 2005-2006: Writing Fiction (certification program).
- • 2017: Ruby Programming classes.
- • 2018: Project Management (certificate program).
- • 2019: Javascript Browser programming.

- 2020: Javascript for Front-End Applications.
- 2020-2021: Writing (certificate program).
- 2022-2023: Cybersecurity (certificate program).

Certified Associate in Project Management (CAPM) | Project Management Institute

Issued May 2018 - Expires May 2023 (Certification 2210708)

Certified ScrumMaster (CSM) | Scrum Alliance

Issued Mar 2019 - Expires Mar 2021 (Certification 1031674)

Microsoft Certified: Azure Fundamentals | Microsoft

RPT Training: Terraform Fundamentals - River Point Technology (Issued Nov 2021 - Expires Nov 2023)

AZ-104T00 - Microsoft Azure Administrator - New Horizons Computer Learning Centers

Strengths Resume - Scoutible

GDPR Compliance: Essential Training - LinkedIn

DevOps Foundations: Site Reliability Engineering - LinkedIn

Site Reliability Engineering: Service-Level Agreements and Objectives - LinkedIn

Writing with Impact - LinkedIn

Technical Skills

Test Automation: Selenium, Playwright, Cypress, Appium, K6.io, TestComplete, JMeter

Languages & Scripting: Python (Pytest), JavaScript, SQL, Shell Scripting (Bash)

API & BDD Tools: Postman, REST-Assured, Cucumber (Gherkin)

Testing Methodologies: Manual & Exploratory Testing, API Testing, Performance & Load Testing, Vulnerability Testing, End-to-End (E2E), Regression, System Integration, BDD/TDD

CI/CD & DevOps: Jenkins, GitLab CI, Git, GitHub, Docker, Kubernetes (K8s), Terraform

Project & Test Mgmt: Jira, Confluence, TestRail, Xray, Zephyr, Testlink, Agile/Scrum Methodologies

Cloud & Virtualization: Amazon Web Services (AWS), Microsoft Azure, VMware vSphere

Operating Systems: Linux (Red Hat, Debian, Ubuntu), Windows, macOS, Android, iOS

Other Skills: Kanban, Scrum, HTML, Web Testing, Mobile Testing, Functional Testing, Software Development Life Cycle (SDLC)
